

Dear Valued Member,

As per our previous communication, Kaelo will fund all qualifying Members and their Dependents for the COVID-19 vaccine and send targeted information to the qualifying individuals that fall into phase two of the vaccination rollout.

The Department of Health announced that from 16 April 2021, the Electronic Vaccination Data System (EVDS), will be available to phase two qualifying individuals stating with people over the age of 60 years to register for the COVID-19 vaccine.

IMPORTANT COVID-19 VACCINE ROLLOUT UPDATE

Registration for the vaccine via the EVDS Self Registration Portal will be open to the public from 16 April 2021

Vaccines will be rolled out from 17 May (phase two) and 17 October (phase three).

Phase two from 17 May will include:

- People over 60 years of age
- Those living in congregate settings eg. old age homes and prisons
- Workers over 40 years of age - this is intended to catch most of those living with co-morbidities
- Essential workers

Use the QR code to access the EVDS Self Registration portal and download the User Guide for detailed information on how to register.

To register for the vaccine, follow the steps below:

1. Register on the EVDS portal.
2. Once registered you will receive a confirmation SMS.
3. When you become eligible to be vaccinated, in accordance with the three Phase rollout plan as stipulated by government, you will be issued with a date, time and venue of where you can receive the vaccine. If you are required a second dose, you will be sent another SMS with the relevant information.
4. Once you have been vaccinated, you will receive a final SMS with confirmation.
5. Please note that vaccination is voluntary.

As Kaelo has access to the largest network of qualified providers, we offer the best route to get the vaccine.

Our range of data allows us to determine who needs the vaccine most and helps ensure that those who do need it most, get it first. This is in line with the government rollout plan.

Through our Prime Cure network, one of South Africa's largest National Primary Healthcare networks, and our various touchpoints, we believe we are in a strong position to distribute the vaccine to our Members and their Dependents.

Sincerely,
Kaelo Prime Cure
